

This cheat sheet provides helpful guidelines on image sizes and layout suggestions to make your event listing look its best!

To ensure the best user experience, event listings require one image or graphic supplied in three sizes (JPG or PNG format). The image on the right shows the required dimensions.

LAYOUT BEST PRACTICES: WHAT TO DO AND AVOID

To ensure your graphic looks its best on our site, we recommend keeping any text or important visual elements out of the bottom third of your design. This area will feature a black overlay displaying the event name, date, and location, which may make anything underneath difficult to see.

Example of Recommended Layouts

The creative avoids placing important details in the bottom third, so nothing is covered by the overlay.

Example of Non-Recommended Layouts

The creative includes details and a logo in the bottom third, which is obscured by the black overlay displaying the event name, date, and location.
